

A Unit of the Technical College System of Georgia - Equal Opportunity Institution

Radiography Program Information

Program-specific completion requirements

In order for the program officials to certify program completion for ARRT eligibility purposes, each student must successfully complete all of the following:

- RADT prefix courses with a final course average of 75% or higher.
- Required clinical rotation hours.
- Published ARRT competency requirements for the Radiography Examinations.
- Terminal competency examinations with a final score of 80% or higher.
- Written terminal examination with a final score of 75% or higher.

Eligibility for ARRT Certification

Every candidate for certification must, according to the governing documents, "be a person of good moral character and must not have engaged in conduct that is inconsistent with ARRT Rules of Ethics," and they must "agree to comply with the ARRT Rules and Regulations and the ARRT Standard of Ethics."

- A criminal proceeding where a finding or verdict of guilt is made or returned but the adjudication of guilt is either withheld or deferred,
- A proceeding in which the sentence is suspended or stayed
- A criminal proceeding where the individual enters a plea of guilty or nolo contendere (no contest), or
- A proceeding resulting in a military court martial

ARRT investigates all potential violations in order to determine eligibility. Additional information may be found on the ARRT website at www.arrt.org.

ARRT also investigates violations relating to:

"the student being subjected to a sanction as a result of a violation of an academic honor code, or suspended or dismissed by an educational program that was attended in order to meet ARRT certification requirements" in order to determine eligibility for certification.

Mandatory Drug Testing and Background Check for Radiography Students

In order to provide competent health care workers and be in compliance with clinical agency contracts, each student will be required to submit to drug screening as well as a criminal background check prior to being admitted into the Radiography Program. Cost associated with these screenings will be paid for by the student. The Radiography Program and the various clinical facilities associated with the program may also conduct random drug screenings. (See Student Handbook)

Positive Drug Screens

It is unacceptable for students to have illegal drugs in their system, to be under the influence of alcohol, or to have levels of legal drugs which are not disclosed and/or for which no prescription can be produced. Positive findings on a drug screen or refusal to submit to a requested drug screen will result in ineligibility to be admitted to the program. Positive drug findings for students who are currently in the program will result in immediate administrative withdrawal from the program.

Positive Criminal Background Checks

If a student has been convicted of a misdemeanor or felony (excluding misdemeanor speeding convictions, unless they are related to alcohol or drug use) they are required to report this to the American Registry of Radiologic Technologists, which is the Radiography certifying agency. The ARRT may decide to take action in the denial of the student's application for certification.

(See www.arrt.org for the Pre-application Review of Eligibility for Certification.)

The student may also be prohibited from attending the required clinical rotations due to a positive background check, which would prevent the student from completing the Radiography program.

Program Length

Radiography occupational courses will be completed in five (5) consecutive semesters.
