

Essential Functions for the Central Sterile Processing

Essential functions for CSSP

- Decontaminates and sterilizes instruments, medical supplies and equipment; and assembles wraps and sterilizes trays of instruments.
- Monitors biological and chemical wash solution to ensure quality and consistency for decontamination of instruments and medical equipment.
- Sorts mismatched sets of instruments, trays and medical equipment and makes them available to sterile processing customers in a timely manner.
- Restocks labels and maintains inventory; submits requisitions; collects and distributes instruments, trays, crash carts and facility medical equipment.
- Performs environmental maintenance duties and assists in maintaining inventory levels in sterile processing, the operating room and in equipment storage areas.
- Verifies that equipment functions properly, requisitions for equipment maintenance, repair or replacement; and removes defective equipment.
- Maintains a clean work area.
- Assists with maintaining established departmental policies and procedures, objectives; and quality improvement, safety, and environmental and infection control standards.
