

Lean Six Sigma Green Belt / Black Belt Certification

In recent years, Six Sigma ideas have been combined with lean enterprise concepts to create a methodology called Lean Six Sigma. The ideas and concepts have moved from being solely for manufacturing and industrial companies to include the service and healthcare industries. The Lean Six Sigma methodology views lean enterprise, which addresses process flow and waste issues, and Six Sigma, with its focus on variations and design, as complementary disciplines aimed at promoting business and operational excellence.

Chattahoochee Technical College offers a combination Green Belt/Black Belt program that will develop the knowledge and skills required to implement and lead process-improvement efforts. Our highly credentialed instructor utilizes the well-known ASQ curriculum, combining it with real-world scenarios to teach participants how to properly collect and interpret data pursuant to leading problem-solving projects. The program includes three full-week sessions with Green Belt training the first week followed by the two Black Belt sessions held one month apart. ***For successful completion of these courses, it is recommended to have a laptop computer and to have some level of knowledge in MS Excel.***

Approved for WIA funding!

**All sessions are held on the Marietta Campus, Monday through Friday, from 9:00 a.m. to 4:00 p.m.
Please see below for the course fees and specific dates.**
